

Functionality

Functionality

Will work with or without *iPad*

USB3 or LIGHTNING connectivity to transmit data for *Komplete Kontrol* and *iPad*

iPad could extend functionality with dedicated *NI* and 3rd party apps like

Komplete Kontrol Touch

browse, manage and edit via touch

(inspired by *iMaschine2*)

Controller Editor Touch

edit controller assignments for all connected *NI* controllers

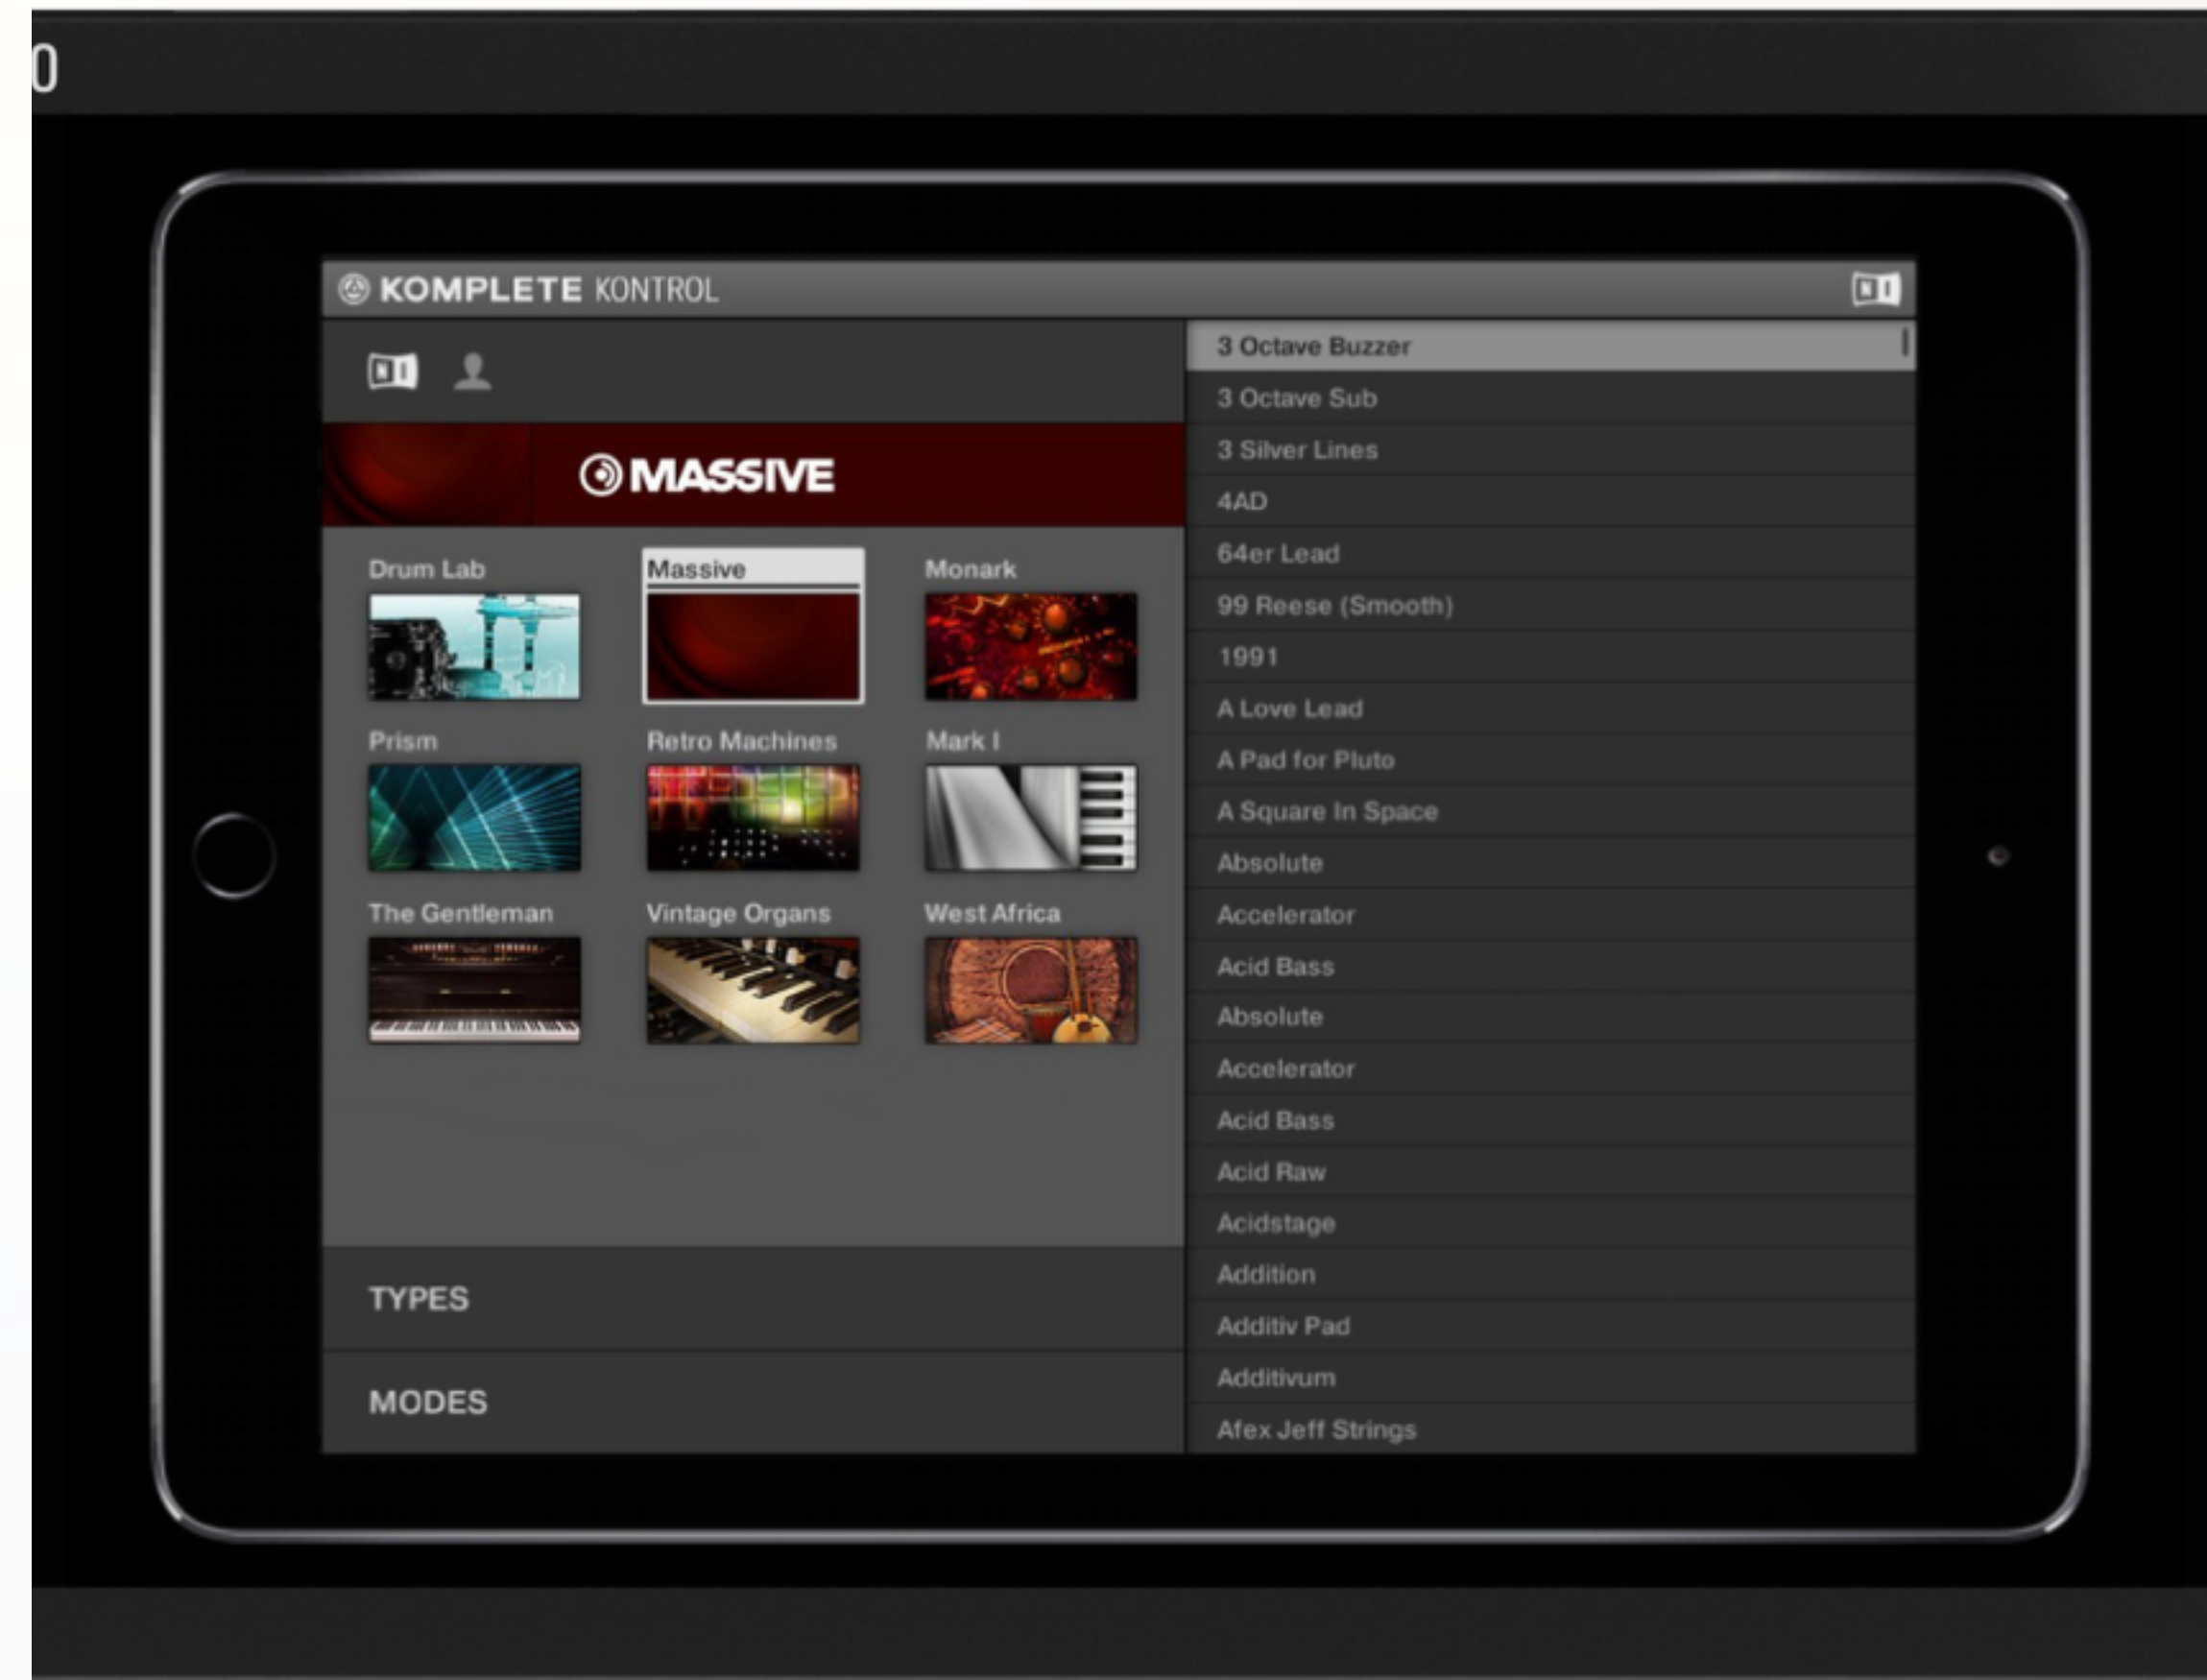

3rd party apps like *LIINE LEMUR*,
TOUCH OSC

Dedicated case for *iPad Air/ iPad mini* for seamless fit into/ connect to controller unit

Inspired by the *Machine* and *Traktor* hardware

the whole controller could be based on a modular concept consisting of 3 basic units that connect via bridge mechanism (scalability?)

The middle unit could be swapped for a motorized fader or *Touch Strip/* rotary encoder pack or a *Maschine* like pad unit (with displays) or mixed and matched

Komplete Kontrol Studio

Benefit

- A sleek modern modular controller that integrates touch technology via *iPad* for *Native Instruments* and 3rd party plugins/ apps
- Easy to integrate into existing workflow
- Take control of *NI Komplete Kontrol*, *NI* plugins, 3rd party plugins as well as DAWs (*Logic Pro*, *Live*, *Cubase*, *Nuendo*, *Studio One*) via user assignable midi CC, *Mackie Control*/ *Mackie HUI* and eventually own *NI* total control protocol (idea)
- Low profile and footprint when placed on desk between computer keyboard and display
- Wedge design for optimal viewing angle

Idea

- The unit is inspired by
