

# Live Track Visibility

Click Track List button  
or use key command and Live will  
show the Track List Browser

User can show/hide multiple tracks  
by clicking or swiping the visibility  
dots to the left of the track icon  
These actions will be mirrored in  
the Tracks View

A secondary click onto multiple  
selected tracks in the Track List  
Browser allows the user to

drag and drop these tracks up  
and down the list to reorder

create visibility groups like  
(drums, bass, strings)  
these visibly groups can then  
be assigned to key  
commands or midi or OSC  
messages (iPad/Android  
Tablet controller apps) for  
show/hide actions

Type criteria like „perc Cinedrums“  
Depending on Track management  
visibility options the Track List  
Browser and the Tracks View will  
filter-out (hide) tracks that don't  
meet criteria similar to a Mac  
Spotlight search

If user selects one or multiple  
tracks in the Track List selected  
Track(s) will scroll into view in the  
Tracks View/ Session View if they  
are not already visible

## Benefit

Quickly navigate large projects based on search criteria or by hiding tracks from the Tracks View

Search and filter results like a Spotlight search in realtime

Click a predefined criteria button to show only these kind of tracks

Highlight a couple of tracks and create track visibility groups for easy recall (strings, brass, drums)

With a touch of a button or key command show only these groups of tracks in the Tracks View

All show/hide actions will be mirrored in the Tracks View and Session View

## Features

A Track List Browser to show/hide one or multiple Tracks

ability to re-name tracks in the Track List Browser

Drag and Drop one or multiple tracks so re-sort them

mute, solo, record enable even hidden tracks via the Track List Browser

### New Key Commands would improve workflow as well:

Open Track List in Browser

Hide/ Show selected tracks

Hide/ Show soloed tracks only (Hide/Show others)

Hide/ Show muted tracks only (Hide/Show others)

Hide/ Show Audio tracks

Hide/ Show Instrument tracks

Hide/ Show all tracks

Show only tracks with Clips at Edit Cursor

Show only tracks with Clips between locators
