

Benefit

Quickly navigate large projects based on search criteria or by hiding tracks from the Tracks View

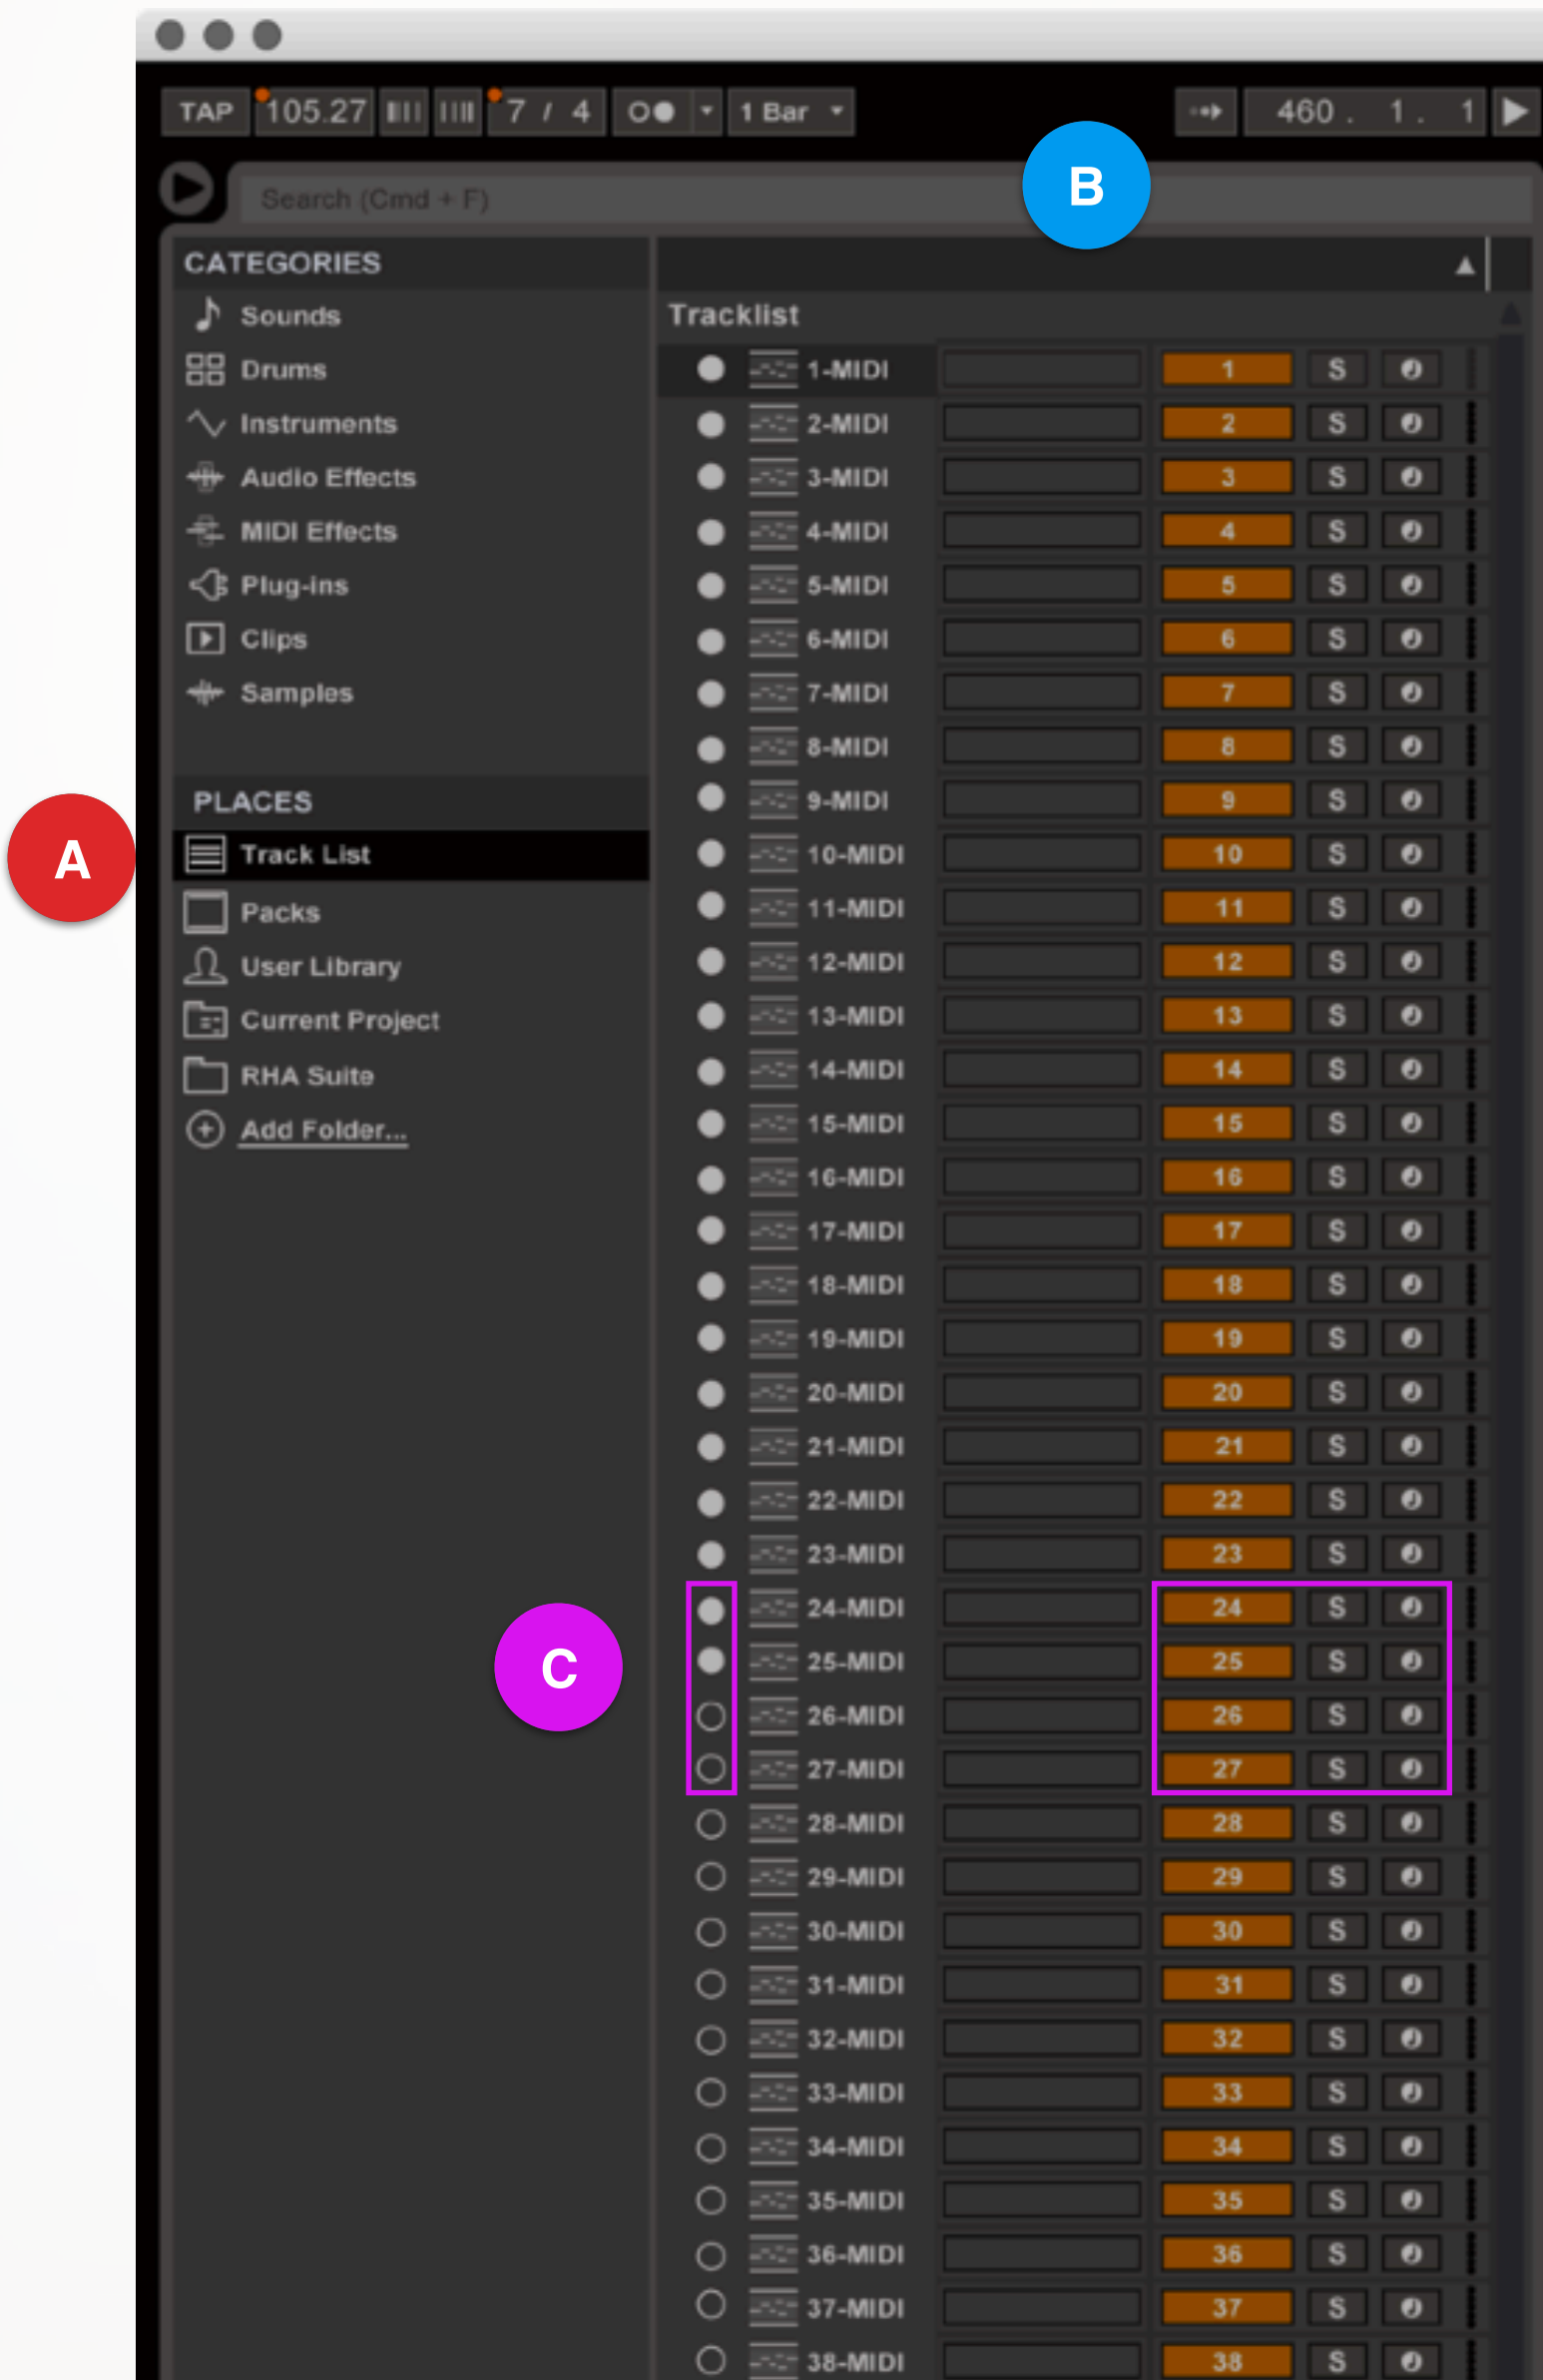

Search and filter results like a Spotlight search in realtime

Click a predefined criteria button to show only these kind of tracks

Highlight a couple of tracks and create track visibility groups for easy recall (strings, brass, drums)

With a touch of a button or key command show only these groups of tracks in the Tracks View

All show/hide actions will be mirrored in the Tracks View and Session View

Features

A Track List Browser to show/hide one or multiple Tracks

ability to re-name tracks in the Track List Browser

Drag and Drop one or multiple tracks so re-sort them

mute, solo, record enable even hidden tracks via the Track List Browser

New Key Commands would improve workflow as well:

Open Track List in Browser

Hide/ Show selected tracks

Hide/ Show soloed tracks only (Hide/Show others)

Hide/ Show muted tracks only (Hide/Show others)

Hide/ Show Audio tracks

Hide/ Show Instrument tracks

Hide/ Show all tracks

Show only tracks with Clips at Edit Cursor

Show only tracks with Clips between locators

Live Track Visibility

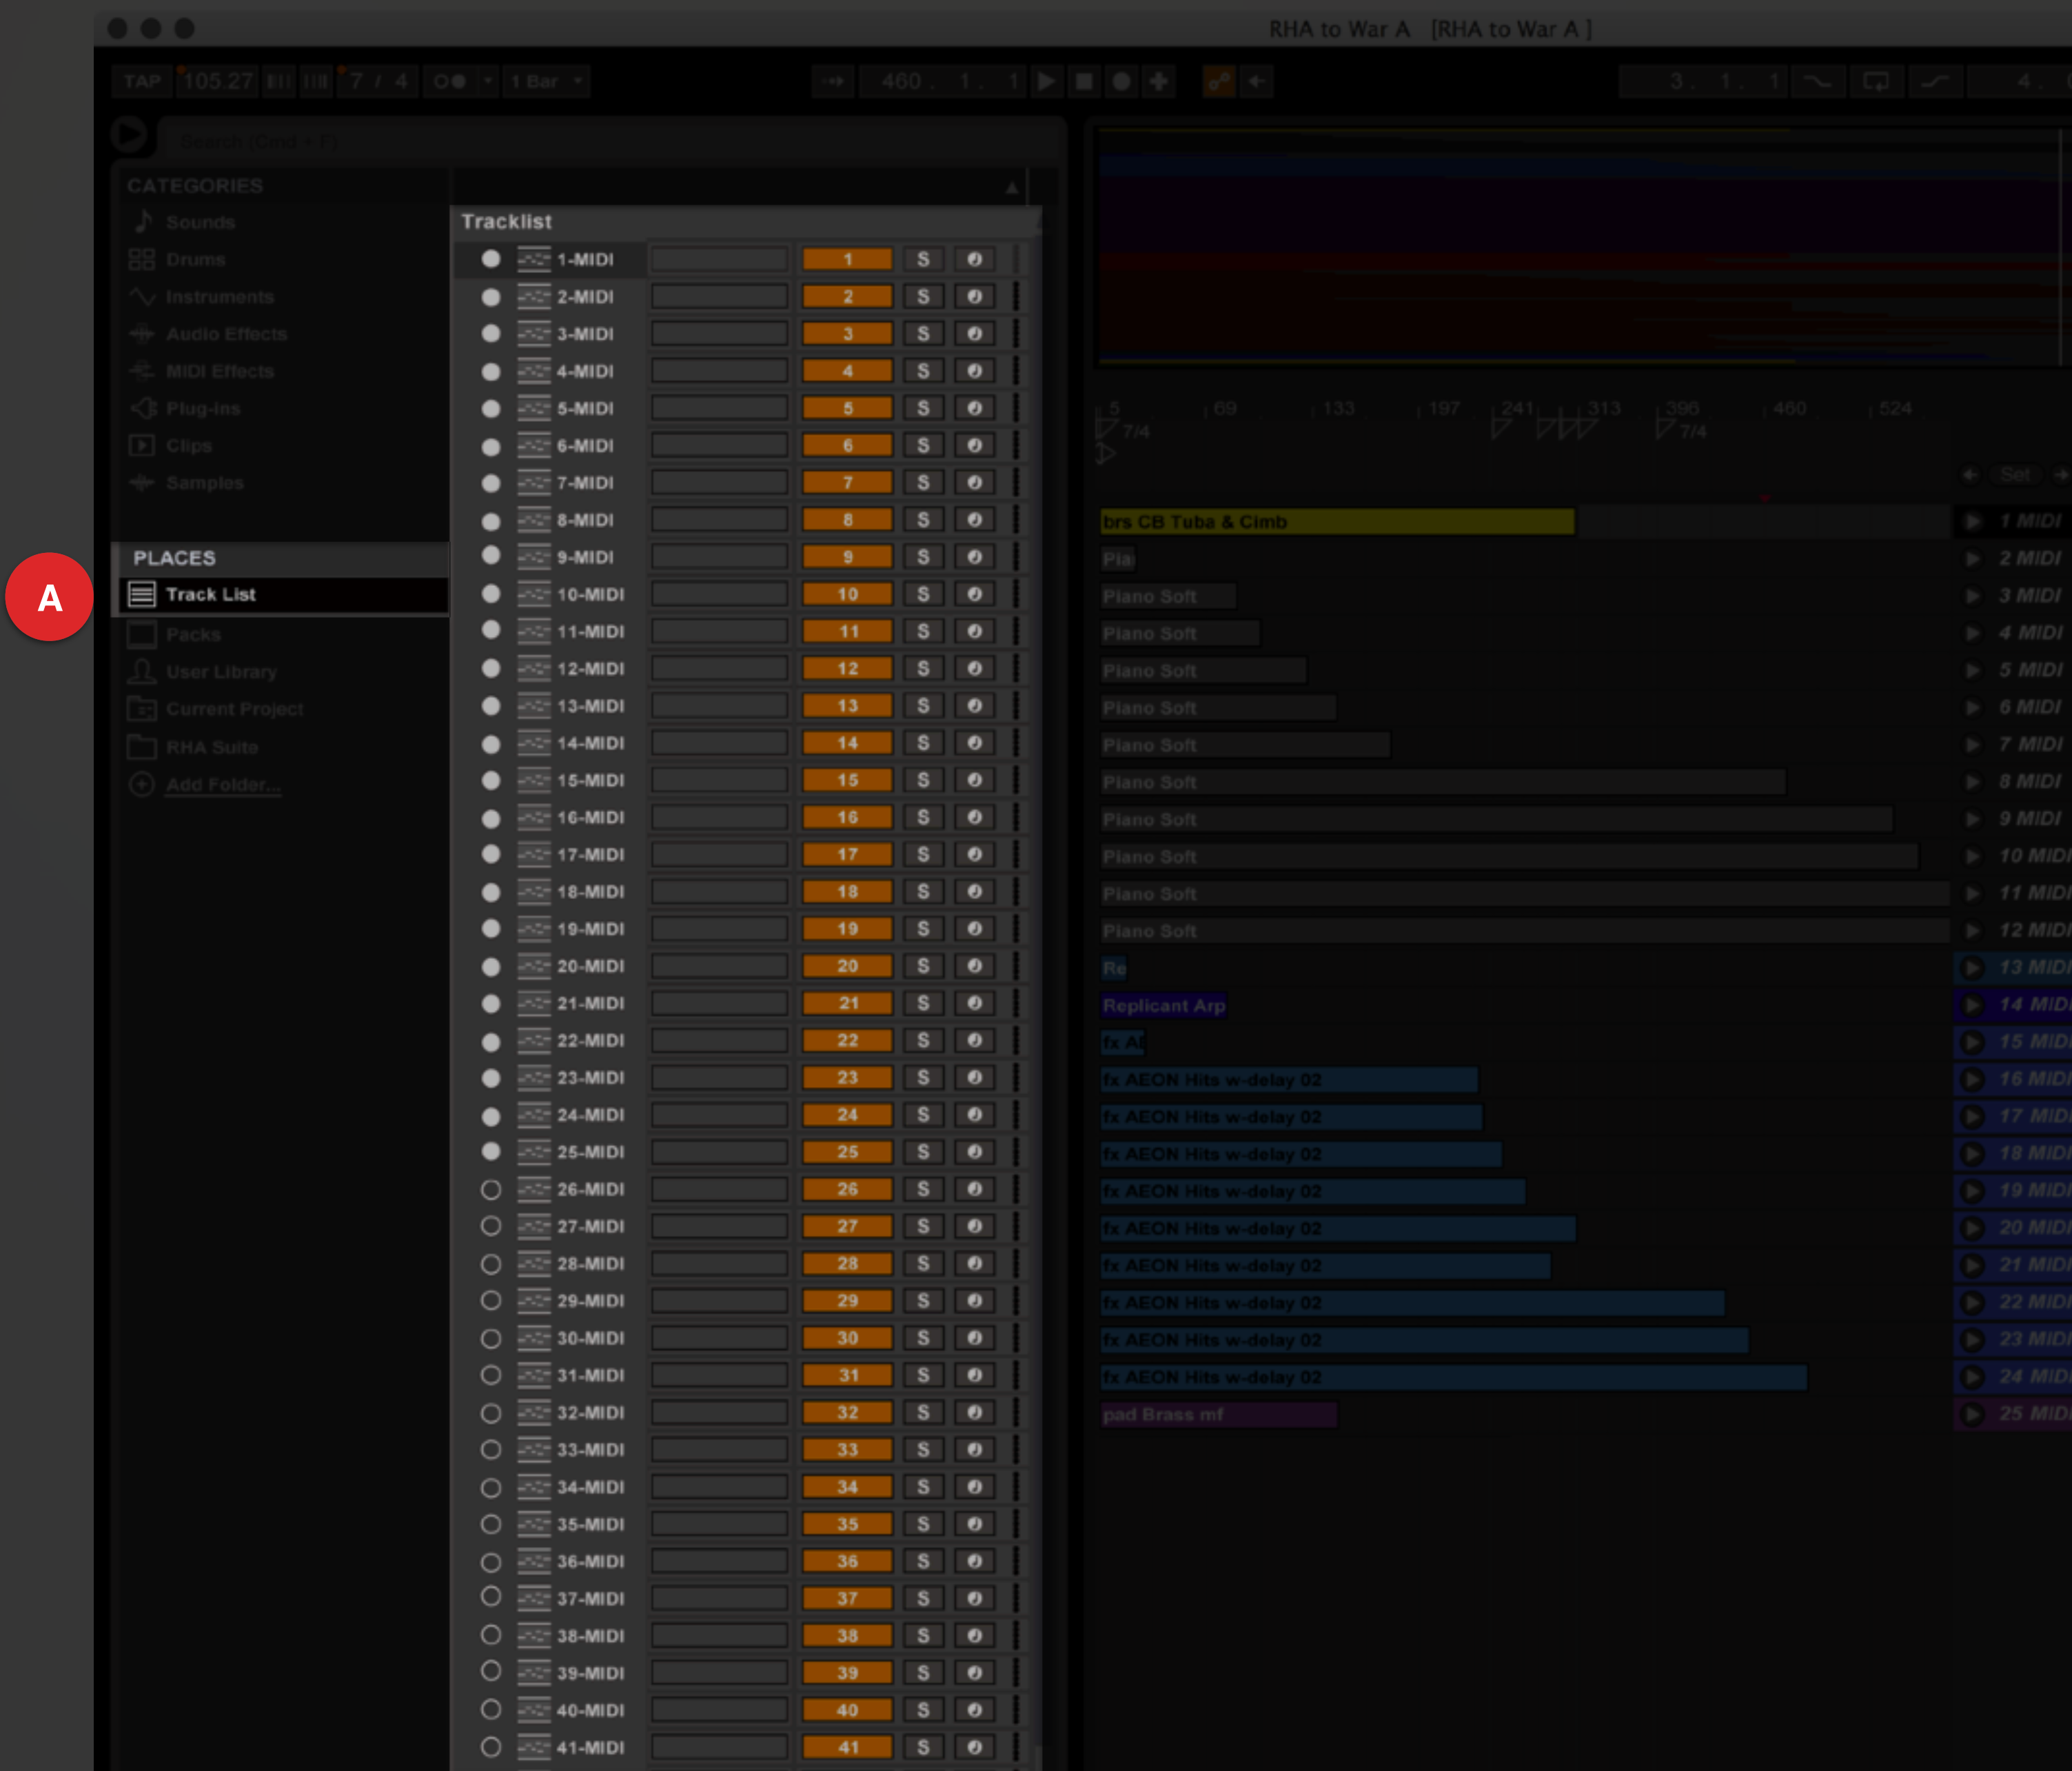

Click Track List button
or use key command and Live will
show the Track List Browser

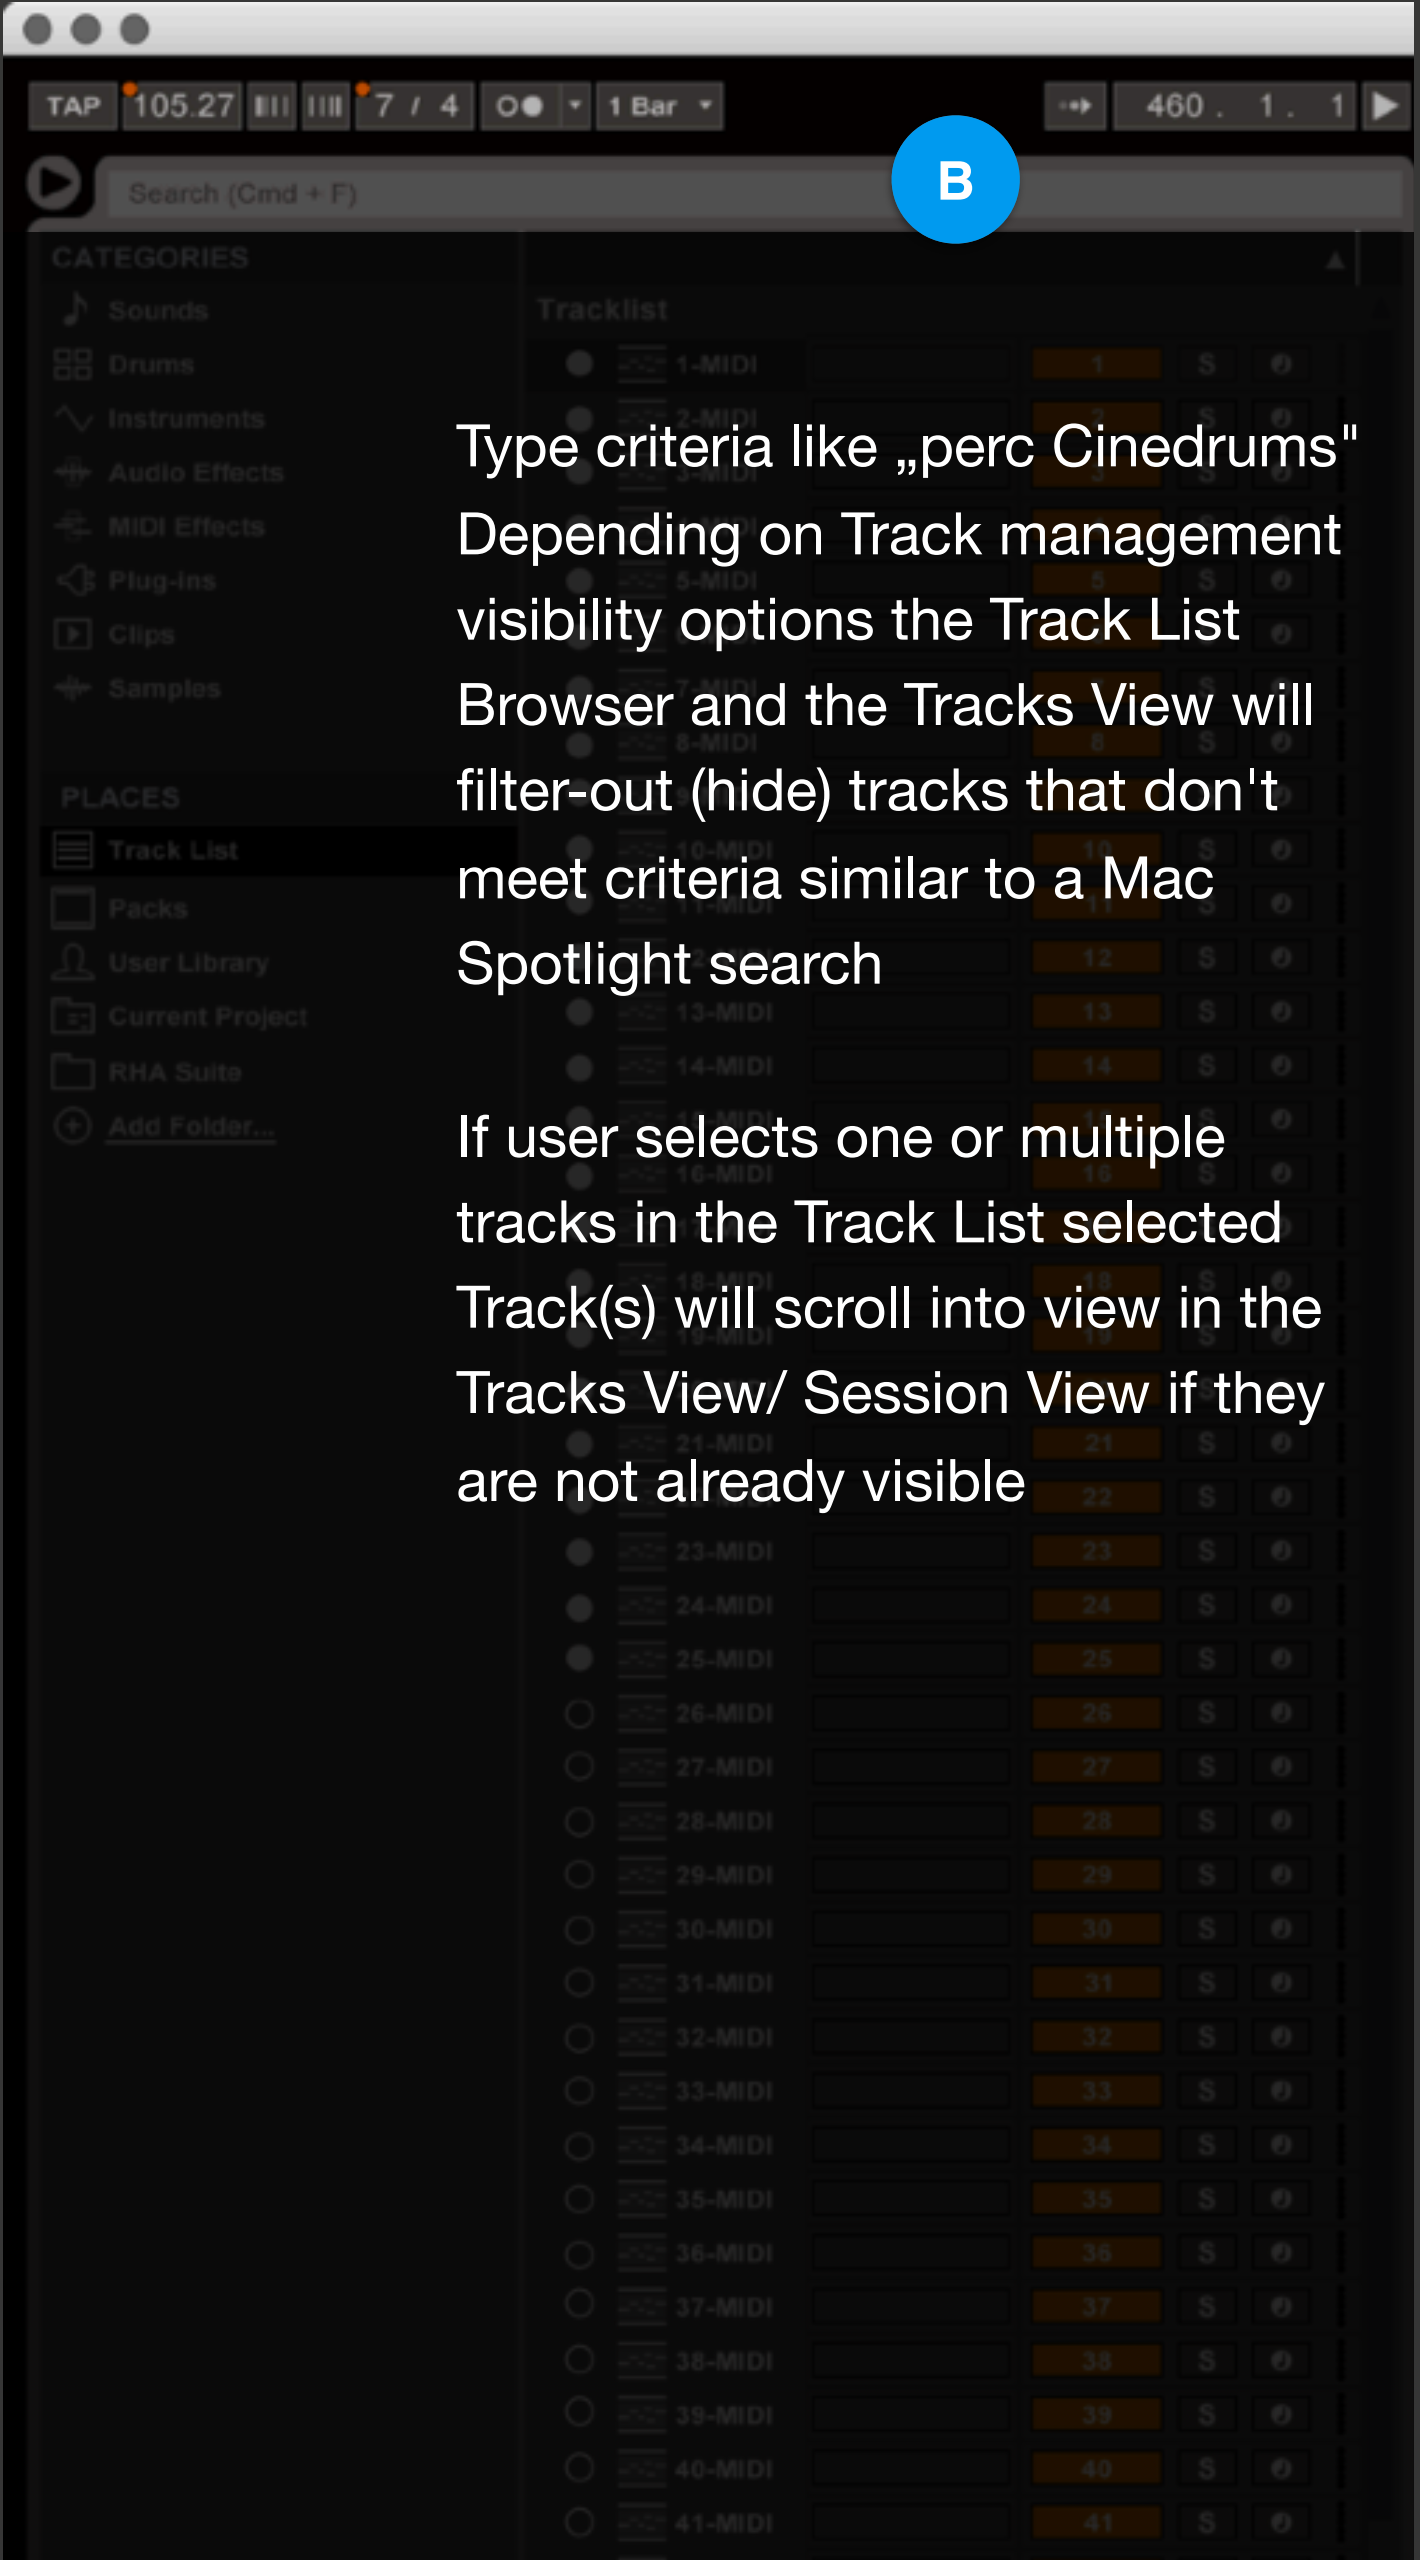

User can show/hide multiple tracks
by clicking or swiping the visibility
dots to the left of the track icon
These actions will be mirrored in
the Tracks View

A secondary click onto multiple
selected tracks in the Track List
Browser allows the user to

drag and drop these tracks up
and down the list to reorder

create visibility groups like
(drums, bass, strings)
these visibly groups can then
be assigned to key
commands or midi or OSC
messages (iPad/Android
Tablet controller apps) for
show/hide actions

Type criteria like „perc Cinedrums“
Depending on Track management visibility options the Track List Browser and the Tracks View will filter-out (hide) tracks that don't meet criteria similar to a Mac Spotlight search

If user selects one or multiple tracks in the Track List selected Track(s) will scroll into view in the Tracks View/ Session View if they are not already visible
