

Live Track Visibility

Benefit

Quickly navigate large projects based on search criteria or by hiding tracks from the Tracks View

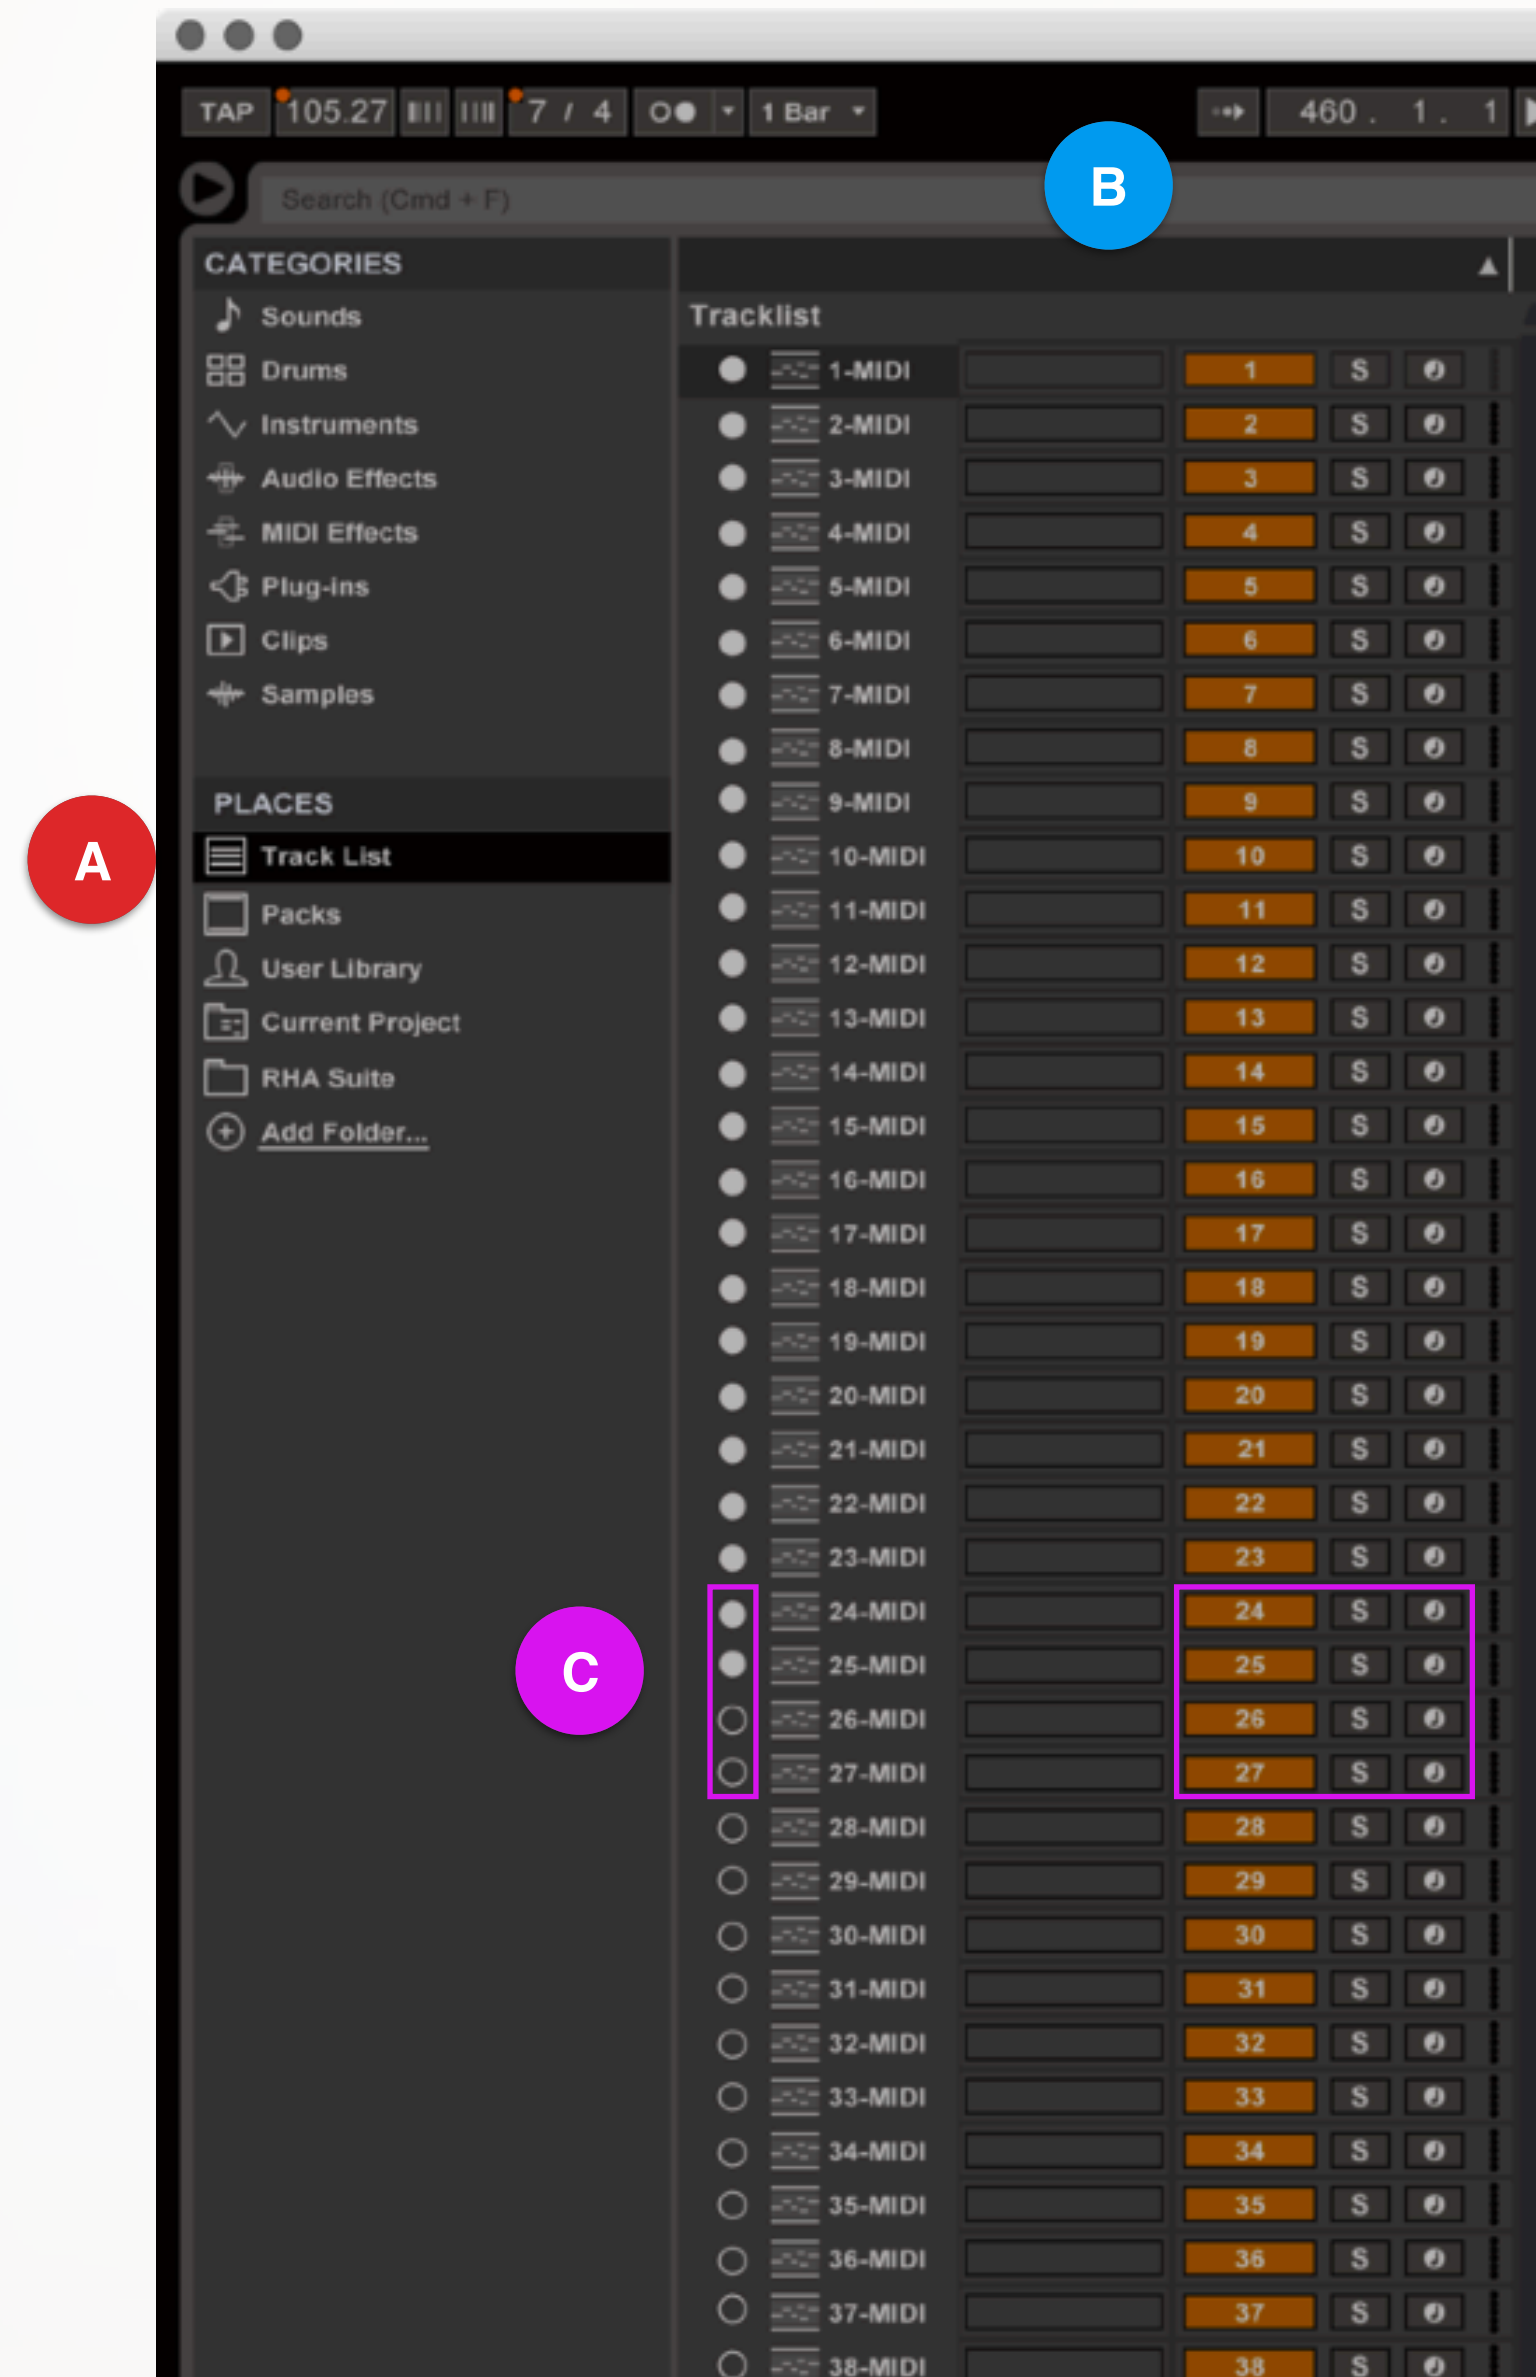

Search and filter results like a *Spotlight* search in realtime

Click a predefined criteria button to show only these kind of tracks

Highlight a couple of tracks and create track visibility groups for easy recall (strings, brass, drums)

With a touch of a button or key command show only these groups of tracks in the Tracks View

All show/hide actions will be mirrored in the Tracks View and Session View

Features

A Track List Browser to show/hide one or multiple Tracks

ability to re-name tracks in the Track List Browser

Drag and Drop one or multiple tracks so re-sort them

mute, solo, record enable even hidden tracks via the Track List Browser

New Key Commands would improve workflow as well:

Open Track List in Browser

Hide/ Show selected tracks

Hide/ Show soloed tracks only (Hide/Show others)

Hide/ Show muted tracks only (Hide/Show others)

Hide/ Show Audio tracks

Hide/ Show Instrument tracks

Hide/ Show all tracks

Show only tracks with Clips at Edit Cursor

Show only tracks with Clips between locators
