## Features

- Zoom to fit Locators
- Zoom to fit All Contents
- Toggle Zoom to fit Selection or All Contents
- Restore Zoom
- Zoom Tool

[click here for an example](#)

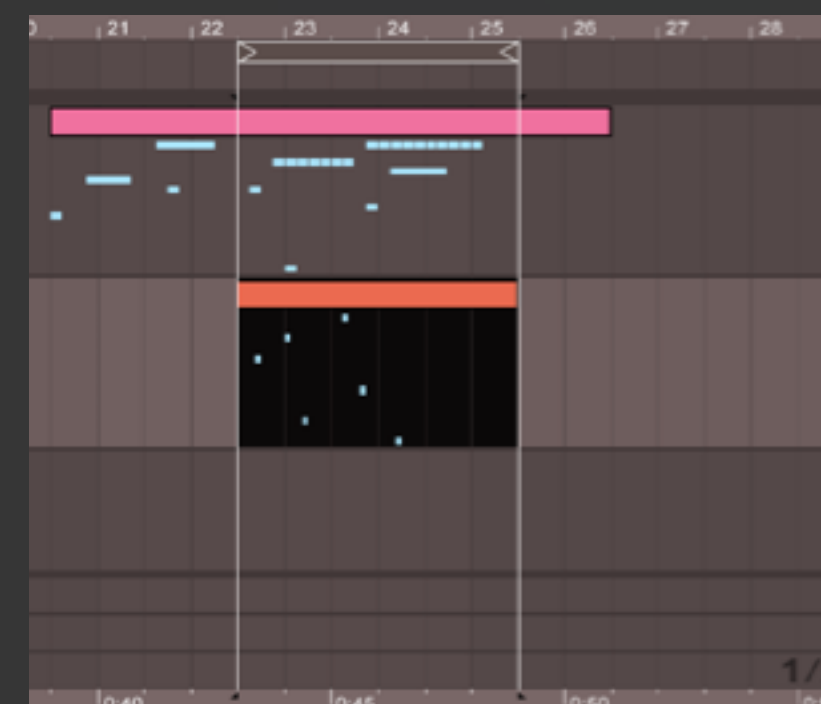

# Live - Zoom Enhancements + Key Commands + Zoom Tool

- In case the Loop locators are set or a Time Selection is made the user can engage the „Zoom to fit Locators“ via View > „Zoom to fit Locators“ or the corresponding Key Command
- If „Zoom to fit Locators“ is engaged Live will zoom all content between Locators or Time Selection horizontally like it does when double clicking above the locators with the Zoom Tool

<b>A</b>	Zoom to fit Locators	⌘4
	Zoom to fit All Contents	⌘A
	Toggle Zoom to fit Selection or All Contents	Z
	Restore Zoom	⌘W

Before

After

this feature allows the user to toggle zoom to fill the screen horizontally and vertically between selected clips or time selection and all contents in the Track Display or Clip View the user can engage the „Toggle Zoom to fit Selection or All Contents“ via View > „Toggle Zoom to fit Selection or All Contents“ or the corresponding Key Command user selects clips or creates a time selection over one or multiple tracks

if „Toggle Zoom to fit Selection or All Contents“ gets engaged once in the the Track Display Live will zoom to the selected clips or time selection and fill the screen horizontally and vertically

(the previous zoom state will be stored)

in the Clip View Display Live will zoom to the time selection and fill the screen horizontally

(the previous zoom state will be stored)

to switch to the previous zoom state the user needs to engage „Toggle Zoom to fit Selection or All Contents“ again

if the user clicks in empty space without selecting anything and engages „Toggle Zoom to fit Selection or All Contents“

Live will zoom to fit all content currently in the session on the screen

Zoom to fit Locators	⌘4
Zoom to fit All Contents	⌘A
<b>Toggle Zoom to fit Selection or All Contents</b>	<b>Z</b>
Restore Zoom	⌘W

# Live - Zoom Enhancements + Key Commands + Zoom Tool

if nothing is selected in the Track Display/ Clip View  
the user can engage the „Zoom to fit All Contents“ via  
View > „Zoom to fit All Contents“ or the corresponding  
Key Command

If „Zoom to fit All Contents“ is engaged Live  
will zoom out to fit all available content in the Track  
Display/ Clip View horizontally and vertically  
similar to what it does when double clicking in the  
Beat Time Ruler with the Zoom Tool or secondary click to  
„Show All“

B

Zoom to fit Locators	⌘4
Zoom to fit All Contents	⌘A
Toggle Zoom to fit Selection or All Contents	Z
Restore Zoom	⌘W

Before

After

this feature allows the user to go zoom backwards through all previously stored zoom states

D

Zoom to fit Locators	<code>\4</code>
Zoom to fit All Contents	<code>\A</code>
Toggle Zoom to fit Selection or All Contents	<code>Z</code>
Restore Zoom	<code>\W</code>
