# Live - Zoom Enhancements + Key Commands + Zoom Tool

X

if nothing is selected in the Track Display/ Clip View
the user can engage the „Zoom to fit All Contents" via
View > „Zoom to fit All Contents" or the corresponding
Key Command

If „Zoom to fit All Contents" is engaged Live
will zoom out to fit all available content in the Track
Display/ Clip View horizontally and vertically
similar to what it does when double clicking in the
Beat Time Ruler with the Zoom Tool or secondary click to
„Show All"
B

Zoom to fit Locators ⌥4
Zoom to fit All Contents ⌥A
Toggle Zoom to fit Selection or All Contents Z
Restore Zoom ⌥W

Before
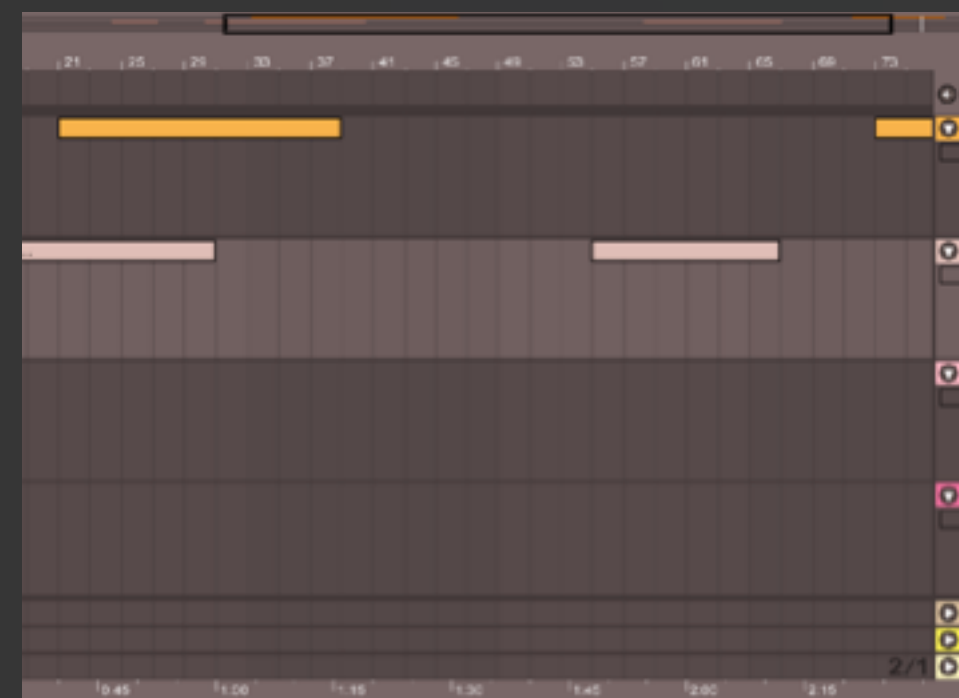

After

this feature allows the user to toggle zoom to fill the screen
horizontally and vertically between selected clips or time
selection and all contents in the Track Display or Clip View

the user can engage the „Toggle Zoom to fit Selection or
All Contents" via View > „Toggle Zoom to fit Selection or
All Contents" or the corresponding Key Command

C

Zoom to fit Locators	⌥4
Zoom to fit All Contents	⌥A
Toggle Zoom to fit Selection or All Contents	Z
Restore Zoom	⌥W

user selects clips or creates a time selection over one or
multiple tracks

if „Toggle Zoom to fit Selection or All Contents" gets engaged once
in the the Track Display Live will zoom to the selected clips or time selection
 and fill the screen horizontally and vertically
(the previous zoom state will be stored)
in the Clip View Display Live will zoom to the time selection
 and fill the screen horizontally
(the previous zoom state will be stored)

to switch to the previous zoom state the user needs to engage
„Toggle Zoom to fit Selection or All Contents" again

if the user clicks in empty space without selecting anything
and engages „Toggle Zoom to fit Selection or All Contents"
Live will zoom to fit all content currently in the session on the screen
